

Better service in a flash

Attention-grabbing handsets from
BT Audio Visual Alerting Solutions

Cut through the noise

If you work in noisy environments, communicating can be tricky. Our Audio Visual Alerting Solutions make it easy. No arm waving. No yelling. Just a direct way to get someone's attention, so you can cut to the chase and get things done.

Fits any work environment

Really noisy or super quiet, your handset delivers an LED strobe light visual alert, an amplified ring sound and voice paging.

One-stop solution

We can provide you with all you need: site survey, the supply of hardware and installation.

Added peace of mind

Three- and five-year maintenance options are available.

Be seen and heard

When your teams can communicate easily, they pull together. Provide a slicker service. Keep customers happy. Give them the right tools to stay in touch, no matter what the level of noise.

LED Strobe Light

Sometimes a standard audio alert isn't practical. Or loud enough. The strobe light notifies you if you have telephone calls and security alarms. And for greater control and flexibility, you can choose between five flash patterns and four colour options.

Audio Alerter

Got a query that needs the expertise of one particular person? Make a paging announcement from any handset on the telephone system.

Or if it's noisy and you're trying to reach someone, make their extension ring louder. You can even create bespoke rings/sounds to be associated with individual extensions.

How to get in touch

You get more done with better communications. Get in touch, or visit www.bt.com/micloud-uc
