

# More power to you

Protect your data and maintain  
business continuity with our  
Uninterruptable Power Supplies

# Keep going, no matter what

Power cuts. They're never welcome in an office. And they're particularly frustrating for colleagues who haven't saved their work in a while. But what about your data and sensitive equipment? Things that could be damaged, corrupted or even lost in the event of a mains power failure or surge.

Our Uninterruptable Power Supplies (UPS) can help protect your business. It's a simple and effective backup system that gives your servers stable and sustained power and keeps your business running. Saving you money on downtime, as well as the incalculable cost of losing valuable data and equipment. But these aren't the only benefits of UPS.

## Earn your clients' trust - and new contracts

Potential new clients want guarantees. That's why they ask what business continuity and disaster recovery planning you have in place. Having UPS will strengthen your credentials and appeal.

## Designed for different needs and budgets

Pick from our two ranges. Choose UPS Lite for a simple and cost-effective option. Get UPS Enterprise if you need the ultimate back-up power. Add expandable battery packs to keep going for even longer if your power goes down.

# Choose the right system for your business

Have a look at the table below to find the one for you.  
Not sure what fits you best? Our experts are on-hand to help.

	UPS Lite (T)	UPS Lite (R)	UPS Enterprise (R/T)	UPS Enterprise Plus (R)
